SUMMARY

Software engineer specializing in creating robust software solutions using React, Next.js, and Vue. With a foundation in JavaScript and SQL engineering. Looking forward to contributing to impactful web development projects and growing within a forward-thinking team.

SKILLS

Languages: Typescript (JavaScript), HTML, CSS, SQL, PL/SQL

Frameworks: React, Next.js, Vue, Nuxt.js, Node.js

Technologies: Redux, Vuex, TailwindCSS, SCSS, MUI, Antd

DevOps: AWS, Firebase, Git

EXPERIENCE

Backend developer

August 2023 – Present

Freedom Finance Life

Almaty

- Created a notification system to identify agents lacking registered contracts
- Sped up contract termination processing efficiency at scale by 100% through the implementation of a mass termination functionality
- Developed and Maintained internal Information System using PL/SQL and CFT
- Provided comprehensive technical support to users, ensuring prompt resolution of issues related to information system

Intern

August 2022 - November 2022

Edetek

Remote

- Deployed and Configured infrastructure using AWS services
- Created web app in team of 2 and hosted in the cloud
- Completed AWS exams and obtained two certifications (Solutions Architect, Cloud Practitioner)

PROJECTS

Sorting Algorithms Visualizer

Vue, Typescript

- Implemented Real-time visualization of sorting algorithms
- Developed dynamic metrics display for comparisons and swaps

Student portal

React, Firebase, Redux-Toolkit

- Developed chat using firestore as a storage for messages
- Implemented functions like registration, taking quiz, download and upload files
- Created admin panel for data administration
- Adopted user interface design mockups from figma prototype using React, Styled-components

EDUCATION

Kazakh British Technical University

Kazakhstan, Almaty

MA Software Engineering

2023 – 2025

International IT University

Kazakhstan, Almaty

BA Information Systems

2019 – 2023
